Location: London, United Kingdom | Lat 51.5074 N, Long 0.1278 W | Time zone: GMT (UTC+0)

Method: Sun position calculation for each date. Sehri Ends = Fajr at 18 degrees; Sunrise and Iftar (sunset) at 0.833 degrees.

Rounding: Fajr rounded down, Sunrise, Iftar and Isha rounded up to the next minute.

Isha: Not in the original timetable. Calculated here at 18 degrees, the same angle as Fajr, and is approximate.

Important: Times are approximate. Please confirm with your local mosque or Jamaat. If your first fast is 9 Feb, read each date one day later. Ramadan starts and ends with the crescent, so dates are provisional.
